Conclusions

- Annotating music data is a challenge
  - Data inconsistencies
  - Underlying model assumptions often violated
  - High degree of subjectivity
  - Dependency on user needs and applications
  - Never trust your annotations!
- Annotations and analyses cannot be separated
  - Needs to be an interactive process
  - Requires a dialogue between domain experts and computer scientists
  - Requires an understanding and adaption of tools
- Opportunities
  - Annotation process becomes subject of research
  - Increasing appreciation of datasets
  - Great potential for interdisciplinary research
